

## JAM - SAUCES - SPREADS

GEODI, based in Athens, Greece, was established in 2007.

Our objective is to provide all natural, high quality jam, sauces and spreads from fresh fruit & vegetable straight from the Greek countryside. By combining the art of traditional home-making techniques with the use of advanced modern technological equipment, we preserve most of the "freshness" and nutrients of fresh fruit and vegetable in the final product, while meeting stringent hygiene requirements. In this way a "home-made" all-natural product is turned into a commercial delicacy of high nutritional value, without additives or preservatives.

### *Authentic Jam & Marmalade Extra 85%*

All-natural Jam & Marmalades, prepared with carefully selected freshly cut fruits, straight from the Greek countryside. Extra high content of fresh fruit, Only natural ingredients - prepared only with fresh fruit, sugar and fresh lemon juice - do not contain any pectin, colors, artificial flavors, preservatives or additives.

### *No-sugar-added Jam & Marmalade*

Jam & Marmalade with Stevia extract as sweetener or fruit juice.

Our newly-launched line of Stevia jam combines full taste and aroma (due to the high content of fruit) with low calorific value (due to the use of stevia sweetener instead of sugar - up to 60% less calories). We proudly celebrate the 2013 great taste gold award for our no-added-sugar stevia strawberry jam with less than 22 Kcal per serving.
